3D Artist

PROFESSIONAL SUMMARY

3D Artist with 5+ years of professional experience creating optimized organic and hard-surface assets for real-time video games. Expert in the full 3D pipeline from concept to engine, utilizing **Maya, ZBrush, Substance Painter, Marvelous Designer, and Photoshop**. Highly proficient in **Unity**, specializing in seamless asset integration, material setup, and performance optimization to ensure maximum framerates and visual fidelity. Self-driven and adaptable, with a strong track record of thriving in collaborative, remote game development environments.

CORE SKILLS

Software & Game Engines

- 3D & Sculpting: Autodesk Maya, ZBrush, Marvelous Designer
- Texturing & 2D: Substance 3D Painter, Adobe Photoshop
- Game Engines: Unity (Asset Integration, Material Setup, Profiling)
- Rendering: Arnold, V-Ray, Substance Stager
- Productivity: Trello, GitHub, MS Office Suite

3D Modeling & Asset Creation

- Organic and hard-surface modeling for real-time games
- Props, environments, and characters asset creation
- High-poly sculpting and detail work (ZBrush)
- Low-poly modeling, retopology, and performance optimization
- Strong understanding of anatomy, proportion, topology, and form

Texturing, Materials & UVs

- Clean and efficient UV mapping
- PBR texturing and material creation
- Texture authoring using Substance Painter
- Material setup and visual consistency across assets

Technical Pipeline & Optimization

- In-engine asset implementation and material setup (Unity)
- Performance optimization for mobile and PC (polycount reduction, draw calls)
- End-to-end 3D asset pipeline management
- Remote team collaboration, version control workflows, and iterative feedback

Production & Collaboration

- Independent, self-starter work ethic with minimal supervision
- Strong creative and technical problem-solving skills
- Adaptable to new tools, workflows, and production pipelines
- Professional communication, teamwork, and feedback iteration

PROFESSIONAL EXPERIENCE

Game Producer

Polysmart SA — Tunis, Tunisia, Nov 2024 – Apr 2026

- Supervised the full game development lifecycle, from planning to final delivery for shipped mobile titles including Wool IO 3D, Dart Heroes, Heroes of Card and Magic, and Herolizer Saga.
- Coordinated interdisciplinary teams, schedules, and production milestones via Trello and GitHub.
- Ensured alignment between art direction, technical constraints, and production goals.
- Streamlined the production pipeline to ensure seamless remote collaboration and on-time project delivery.

3D Artist

Polysmart SA — Tunis, Tunisia, Jul 2021 – Feb 2024

- Created game-ready organic and hard-surface 3D assets including props, environments, and characters.
- Translated concept art and orthographic views into fully realized models while maintaining artistic style and direction.
- Sculpted high-detail assets in ZBrush, then performed retopology and optimization for real-time performance.
- Produced clean and efficient UV layouts, maximizing texel density and minimizing distortion.
- Authored PBR textures and materials using Substance Painter, ensuring visual consistency under different lighting conditions.
- Balanced high-resolution detail on low-poly meshes to meet performance requirements.
- Collaborated with designers and programmers to ensure assets integrated smoothly into Unity.
- Worked independently to solve technical and creative challenges while meeting deadlines.

3D Artist

The Full Room — Tunis, Tunisia, Mar 2021 – Jul 2021

- Modeled photorealistic furniture and environment props for visualization and interactive projects.
- Focused on strong shape language, realistic proportions, and clean silhouettes.
- Created textures, UVs, and materials while respecting technical and visual constraints.
- Produced polished renders using Arnold and V-Ray with balanced lighting and composition.
- Managed multiple assets independently while meeting production deadlines.

3D Artist

Galactech Studio — Tunis, Tunisia, Oct 2020 – Mar 2021

- Designed and produced characters, props, and environments from scratch for mobile games.
- Demonstrated versatility across organic forms and hard-surface structures.
- Optimized assets for mobile and real-time performance requirements.
- Collaborated closely with development teams to meet gameplay and technical constraints.

EDUCATION

- **Master's Degree – Video Game Development**
Université du Québec à Chicoutimi (In partnership with Polytech Intl University of Tunis), 2020
- **Bachelor's Degree – Management Computer Science**
Faculty of Economic and Management Sciences, Sfax, 2018

CERTIFICATIONS

Principles of Video Game Design and Development — 5 march 2019

Game Engine Fundamentals — 11 march 2019

LANGUAGES

- **Arabic:** Native / First Language
- **French:** Advanced / Full Professional Proficiency (C1)
 - TCF Canada (July 2025)
 - Scores: Reading: C1, Listening: C1 | Writing: C1, Speaking: C1
- **English:** Upper-Intermediate / Professional Working Proficiency (B2)
 - IELTS General Training (October 2025)
 - Overall Band : 6.0
 - Scores: Reading: 6.0, Listening: 5.5 | Writing: 6.0, Speaking: 5.5
